AU-106

Main Features:

Remote signaling module AU–106 connected to the devices with output based on relay's "dry contacts" closing or breaking.

Also AU–106 has an input to connect devices whith signaling output based on output DC voltage to indicate failure.

AU–106 provides for visual and sound signaling and allow its check–back.

Technical Description:

- Signaling support based on relay's "dry contacts" closing/breaking.

- Signaling support based on DC voltage output on failure.

- Current consumption on signaling input:
  no more than 2 mA

- Power voltage: 12..24 VDC

- Weight: no more than 500 g

- Overall dimensions:
  88x108x54 mm
